

THE ADVENTURES
OF THE SAGATICS.

Origins

2: On a roll

Welcome back to the Sagatics world!
This is a long series of books that has many seasons. I hope you like these books!

Book 2 characters:

Levi: An orphan boy who lives in a very fancy new base and apparently is in charge of a team now?

Powers: We don't know yet

Brothers or sisters: 1 sister, Lexus

Touni: A girl who is really excited to join the Sagatics, she and Levi become best friends.

Powers: I can't tell anything yet

Brothers or sisters: we don't quite know?

Check the end of the book for the Q&A section!

Chapter 14: PPP's

Chapter 15: The Real Problem

Note from author

Chapter 14: New home (Reminder)

I had never had such a nice house in my life it had everything from a roll of super nice toilet paper to an ice cream dispenser and a hamburger making machine. It was LEGENDARY I could never have asked for a better house anywhere anytime it had a bunch of tubes that I had no idea what where for and there was an area on the top floor where there were buttons and screens everywhere so I could watch multiple movies at the same time while playing mineplex on a bigger screen than the

inti-tab! So much food, so much entertainment and I was suddenly hit with how tired I was after 3 days of nonstop chaos I took a nice long nap then when I woke up, thinking I was going to eat lunch when it was time for bre years then suddenly my doorbell rang, I was surprised then I thought will my team already start right now? I was going to have fun with my new life I just knew it. I opened the door and a girl was standing by the door. Hi she said, my name's Touni.

Chapter 1: New friend

Immediately, I was speechless the second this person walked up to the door of my little bace. I nodded my head and said Hi, I'm Levi. Touni responded I am supposed to be your first teammate, I've been wanting to come to Eco for years and whenever they came and knocked on the door I knew they had come to recruit me. I had been playing their test video games for years and I got #1 every time by at least 1000 points so I think they got interested in me

and they decided to recruit me. I stared for a second, stunned and then said.

“Well come in, don’t just sit there outside in the cold, come in. I’m just saying that I’m a very good builder. They brought me here and said there was a flying system in this base that I could repair so then we could go on our first mission.

She said excitedly, I want to get working right away, so where can I put my stuff?

Something I thought was weird was that there were 12 rooms inside this building so I let her choose one of the eleven

empty ones. She chose a medium sized room where she immediately started

working on the bed making sure that all the screws and bolts were ok and started plastering pink colored wood with

flowers on it. I thought it was fun that I

had only had this team and house for one week and we were going to build a flying system for the base and we might get our first mission very early on so I think this Eco thing working out very nicely I think this superhero/spy thing working out very nicely!

Chapter 2: Rocket awesomeness!

The next morning Touni went right to work repairing the rockets, I was very impressed that she went write to business. When I asked her about it, she said we need to get right to it. So that we can go on our mission. I was also very exited about this mission concept so I really hoped that Touni knew what she was doing because I have been watching Eco missions on the intiV and they were the coolest thing that I had ever seen, I went on an app called Eco

onward that was pretty much the news of what happened in eco missions. I saw so many names in one of them and I looked into that mission: Successful. I looked at all of that team's missions. All successful! It was unbelievable how good some people were at this, I really hoped I'd meet that team at some point in a future mission. Just then I heard a rumbling noise from the engine room and then boom, the ground was shaking. Rumble, rumble, rumble. Touni came running in and said: It's working, it's working! We both ran up to the control room and I pulled on the lever that said: flight activation off. It flashed to the green "on" sign and whoosh, we took off. We were just hovering at first but right when we were about to fly up fast into the air,

someone motioned us to come back down. I pulled back on the lever and the engines shut down. We walked out the door and he said "You are the Sagatics team, no? I have something for you" he held out a folder that said: TOP SECRET: Mission 1500, destroy after mission completion!

Chapter 3:

Mission 1500

I thought it was amazing! We had our first mission about two minutes after we had finally made our base fly! I never realized how fast Eco was. Right after that guy gave us our mission folder and the map, he said "sorry I have to go" and he ran faster than I had ever seen a human run before (not that I had known enough people to see how fast they are but still. Right after he left, Touni came down and asked what in the world that guy was doing here, I showed her the folder and she was mesmerized by it it

said on the cover in bold black ink:
Mission 1500: top secret document! We both looked at each other and silently agreed on one thing we would complete whatever mission it was. There was a red button on the paper I was not dumb enough to think that a paper red button could actually be pressed, well I was completely wrong I tapped it and a voice said "Mission activated! Your mission is to report to a city nearby called Sagatic city and report at the eco base over there." The base looked kind of like a pyramid but it was made out of glass it looked like this  "Inside the pyramid you will find a girl named Emerald, she will be joining your team and she will tell you of the problem in Sagatic city, good

luck. Me and Touni stared at each other and nodded we were going to form the best team Eco had ever seen.

Chapter 4: *Sagatic city*

The ride to Sagatic city was uneventful we just rode and watched through the windows of our ship, it was amazing! All my life I had only seen one place before and it was only white blank desert that stretched infinitely, snowy hills and nothing else that I could see out of the windows of our settlement. I thought it was amazing flying over Eco City all the tall skyscrapers and the Millenia Tower, the biggest building in the world. We would have flown right into it if Touni had not quickly pulled on the steering wheel and pulled the ship away. Other

than that close call there the rest was just calm and peace. (Personally I would not of loved to be the person to of broken the tip of the tallest skyscraper in the world) We flew through a lot of desert roads until in the distance I saw a shining light, than I saw many, then I saw skyscrapers. We had arrived in Sagatic city. Touni flew us a little higher and then we saw the real beauty. Buildings, skyscrapers, out in the distance I saw forests and I also saw a big glass pyramid and so I went and tapped Touni on the shoulder and said: "Uh, it think we need to go to the giant glass pyramid. I said sarcastically. Touni rolled her eyes. We flew into the big place where a bunch of other ships were parked so we assumed that was where

we parked too. I looked around at everything in the city, I had never seen any buildings, shops, or anything else. We walked to the front door and it opened for us. "This door is such a gentleman" said Touni. We walked up to the front desk and said we need a girl named Emerald. The girl at the front desk yelled: "Chuck can you get Emmy for me". A faint voice responded: "yea she'll be out in a minute". The girl at the front desk turned around and looked at us and asked: "Why do you need Emerald?" And that was the first time I actually got a good look at her, and the second I actually saw her I had one thought: She looked beautiful. And I was not just saying because the first girl I ever saw I instantly got a crush, cause if

that was true it would have been Touni but this was different, she had brown hair and hazel eyes. What's your name I said instinctively. She said: "Oh I'm sorry, I'm Olivia, who are you?" "I'm Levi" I answered I am the leader of the Sagatics team. Touni scowled at me for totally leaving her out of everything but I ignored her. Olivia said, "You guys are the members of the new team, you should have told me that before, I could have taken you straight to the gear room." Right after she finished saying that another girl who I assumed was Emerald because she had emerald green hair said, "Are you guys Levi and Touni, members of the Sagatics?" She asked Me and Touni nodded. She said, "I'm on

your team.” She looked at Olivia and said, Olivia get us geared up.

Emerald

Chapter 5: Geared up

Olivia led us to a room that was so amazing I literally had stars in my eyes

There was rows and rows of spy jackets, laser guns and other things I had only

heard about in books, other ECO agents were gearing up some of them had symbols and I guessed they were also part of a team just like me, Touni and Emerald who had the letter S pinned to our shirts, (I didn't have time to make a good logo for our team yet) and some of them didn't have a symbol at all and I assumed they were solo. Help yourselves to anything on this row, said Olivia. We did help ourselves, I chose a red spy jacket, two dual ninja swords made out of a red material that I didn't recognize. I got a laser gun and I got some armor to put inside my spy jacket. Emerald to no surprise had chosen an emerald sword, she only chose one because in the other hand she had something I hadn't even known existed, a machine

laser gun, it looked EPIC, she looked pretty cool but not cooler than Touni. She had chosen a full set of iron armor and slung over her back was a big hammer and a shield in her hand she looked like the total tank. There was an area that said we could customize our stuff, but it would cost money, not free like the stuff at the armory. I was the only one who decided to customize my stuff, so I asked them to make a cuts on the outside of my swords so it looked like iron on the edge. Emerald was happy

One of
My
Swords

until she remembered we were not here just to get cool stuff, we also had to go on a mission, Emerald told us about the real mission.

Chapter 6: *The problem*

Emerald told us about the real mission, there were 3 thugs that were doing random stuff around the city. It seemed like a job that I thought anyone could take care of until I heard that the thugs were using magic. So I guess it wasn't that easy. The thugs supposedly were hiding in some random corner of the city. We went searching. We were searching for at least half of the day that was left and then we heard voices Emerald turned around and shushed us

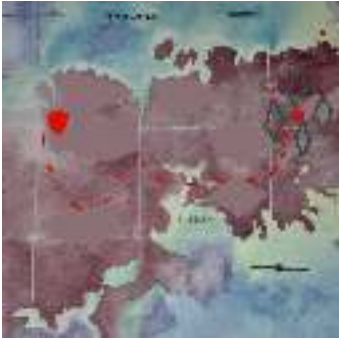

I drew my sword but Emerald shook her head and mouthed the words I got this. She pulled out a red colored laser gun ammunition that looked like this:

I laughed silently as she loaded her gun with it and she shot it directly at the thugs and kaboom the thugs were blasted against the wall and the map that they had in their hands fell to the ground we ran over and Touni pressed her hammer against one of the thugs necks and I drew my sword and did the same and Emerald also drew her sword and did the same. I told them to empty their pockets and they put out three maps, they were definitely magical because they were not destroyed by the explosion. They also drew out a shard of something and they drew out a square

piece of glass that was glowing and a round thing with a blue crystal inside it, I didn't even get a good look at it before Emerald picked it up and stuffed it in her own pocket. I picked up the rest of the stuff. We had solved the problem in Sagatic city. We had already completed our first mission, we were on a roll!

Chapter 7: *The map to somewhere*

We went back to the eco pyramid and I walked back up to Olivia, trying to impress her. "We already completed our first mission." I said. It worked, her eyes shined as she said, "Already, that's not possible!" She exclaimed. "That's definitely a new record of all the Eco databases, not that I know them by heart." Emerald looked at her strangely and said, "I thought as an Eco desk worker you had to memorize them."

Olivia blushed and said, "I know but I'm new at this." None of us asked anything else as she typed on the Inti-tab on the desk and said, "Mission registered, I'll be seeing you guys later. You can have all the stuff that the thugs gave you we don't need it so you guys can do whatever you want with it. Now that you have 1 completed mission we will start training potential recruits for your team." We walked out of the pyramid and got back inside our ship. We remembered that the thugs had given us 3 maps so we decided to examine those. They didn't fit together so we decided to put them on top of each other and since they were magic, they merged together and made one giant map that had a location marked in it. The starting point was

Sagatic city and the ending point was some random forest on the outskirts of the map. It has an image of 4 crystals. Suddenly, there was a loud bang, bang, bang, on the doors. We were not expecting new agents from Olivia that fast so we just played it safe and drew our swords. Touni pressed the button to open the door and it swung open, she put her shield up and we saw Olivia standing with two other kids, by the looks of them, they were ECO agents. I asked Olivia who they were, she answered, "These people are Tyler and Nelly." I looked at them for a second and stumbled for a second while looking at Nelly. She looked almost as pretty as Olivia. Here is her picture

I asked Olivia, who are these people? She answered with a smile that made me regret anything I said about Nelly being pretty and she said, "These people are part of another team, but they will be working with you. I went and shook Tyler's hand, he said, "Hi Levi, I just think

we are going to be really good friends.” I thought in my head, I like this guy. I went over to Nelly and she smiled at me and I smiled back. I took them inside and amazed them with all the features of the ship. Apparently, Tyler had researched about the crystals and told us all about what they could do. **THEY COULD GIVE US POWERS!!!** There were multiple crystals throughout the world, but the crystals of, fire, energy, psychic, earth and nature were all there. We couldn't wait to get the crystals!

Chapter 8: *The Crystals*

We were on our way to the crystals, me and Tyler were excitedly talking about the crystals and other things, and the girls were also talking, but they were so excited, they were practically jumping up and down in their chairs. One thing was clear, we were all excited. We had entered the coordinates of the location of the crystals in the autopilot of the ship and the ETA was 5 hours. We finished talking and watched a movie on the big inti-screen in the living room then we had a video game tournament. Nelly was the best at the role-playing games, Tyler was

amazing at the flight simulators, I destroyed everyone at Mineplex, and Touni and Emerald won the battle games. Long story short, we all had fun playing and laughing. We were all going to be good friends. Eventually at around 9:00 PM, Tyler and Touni had just fallen asleep on the couch, was when the computer voice said, "ETA, 5 minutes. Tyler woke up and said, "Whass happenin?, are we there yet?" I answered, "Yea, ETA 5 mins, so everyone get ready and get your stuff out. I can't wait to get powers, Nelly said. She was jumping up and down. Suddenly, there was a rumbling noise, the ship was shaking like crazy, and the girls were screaming. Then it all stopped and we landed. Touni went and pressed

on the button to open the doors and we went out of the ship and we were in a random forest. There was a shining area in the corner and we all covered our eyes. As soon as we got nearer, the light stopped and 5 white crystals were sitting in the center of all the dirt. It was that easy. I picked up a crystal with the ancient symbol of the power of energy in the middle. Emerald got the power of nature, Touni the power of earth, Nelly got the power of fire and Tyler got the coolest one besides me, the power of psychic. We couldn't wait to use our powers, but that might not be happening for a while, none of us knew how to activate them. Touni even tried biting it, I learned something, I don't think those crystals would shatter anytime soon, but

I do think Touni will have to see her dentist.

Chapter 9:

Elemental

Emerald

We were successful on our side quest. But we had absolutely no idea how to activate the crystals. So we were all just as disappointed as if the quest failed. We flew back, the happy and excited vibes had disappeared. Until suddenly, we heard a big explosion in the back and we heard Emerald scream. We ran into the back where she was and she was holding the her crystal and it wasn't white anymore, it was green. Her eyes

were green too, it was kind of creepy. She looked like a green monster cause a green aura had enveloped her.

“Is she going to be alright?” Nelly nervously said. “I hope so.” I looked around at everyone in the room, and they all looked worried too. “Maybe it wasn’t such a good idea to get crystals that were on a map that some random thugs had for We all stopped for a

second to understand the real truth in that. Then the aura, the lights, it all stopped. She looked normal with her eyes open, Nelly and Touni went to pick her up and she stood up for a second, and then fainted. I ran to the kitchen, got a bucket, ran to the bathroom, filled it up and poured it on Emerald's head. She woke up with a Ghhhbluhphuu. As she spit out all the water from her mouth. "What happened?" Tyler asked instantly. Emerald answered, "I don't remember how I activated the crystal, but I know I did and some weird voice in my head, I think he said his name was the Cerulean Zero, he said you needed some sort of stone to activate the rest of the crystals because mine was the only charged one. He said he marked the place on our

magic map. I looked at the map and sure enough on the bottom of the map, in little words said:

COME TO THE COORDINATES MARKED BELOW: 88, 87, 64 COME INSIDE THE ANCIENT RUINS MARKED THERE.

There were two things to do, either go back to ECO and tell Olivia that we failed to complete our side quest, or follow some coordinates that some guy named the cerulean zero had given us. I made the decision for us. "Computer, reroute to coordinates 88, 87, 64."
"ETA, 9 hours, the computer answered.

Chapter 10: *The Trap*

Ok so you already know about our trips, video games, sleeping, playing. So I'm just going to fast forward to the exiting part. We landed right at the coordinates, and we went inside the ruins. This was where the cerulean zero had told us to go, and we could trust him, but could we actually, we had no idea who he was. I was starting to think that looking like an idiot in front of my crush might could have been better than whatever is going

to happen to us here. I was about to say to turn back when I heard a noise. Everyone drew their weapons and Emerald, activated her powers which magically, she knew how to use. There was another big boom and Emerald who had activated her powers, fell to the floor with a stun bullet in her shoulder, then Touni, then Tyler. Me and Nelly screamed, I went grabbed her hand, and we ran. We almost made it out but Nelly turned limp, I tripped and I fell and I felt it hit my shoulder and I grunted and turned limp too...

Sometime later, I woke up in a cell, my back hurt, and I realized that that was where the bullet had been. Tyler was

next to me and I shook him, he woke up. "Where are we?" he said. "I think we are in some kind of jail cell. It had one bathroom covered with a curtain

"If we are going to die here, we might as well talk about something." said Tyler
Ok if we're going to die than I guess, I'll tell you my crush. "Oh I already know

that." Tyler answered, it's Olivia "Yea, I guess that's right." I answered. "What about Nelly?" Tyler answered. I blushed *I didn't even know why, or did I?* I don't really know? "She's okay, she's cute." *Did I actually say that?* "Are you sure that you have a crush on Olivia, because it seems like you like Nelly better." *Did I?* I decided to change the subject. "What's yours?" I asked. "I don't know, I think I just haven't met the right girl yet. Just then there was a banging on the door and a man with blue armor said, "bring them to the interrogation room."

Chapter 11: The Interrogation

I was put in a chair and I thought about escaping until they put a super strong rope around me, so I couldn't, then the girls were dragged in, Touni was snarling at the robots dragging them in. Sitting on a ledge was 5 crystals, one was Emerald green, I knew who that one belonged to, and the other 4 were sitting as white as ice, powerless. The cerulean zero was standing and then he spoke, saying, "you are charged for magic use and, now I can come one step closer to destroying all magic in the world. If I press this button, it will destroy the

crystals and all their... BOOM, A helicopter that had 3 letters on it ECO. I recognized the driver instantly, it was Olivia and some other boy who I didn't recognize was firing the helicopter guns

The cerulean zero was blown to the floor, and his power sucking machine smashed into pieces. Nelly saw the opportunity and grabbed the crystals.

Olivia yelled, "Rub the crystals!" Nelly rubbed furiously and she was covered in a red aura and her eyes turned red, but she didn't faint like Emerald, she just yelled, "Inferno!"

And then, Boom! Everyone stopped to look at the burned charred, smoking Cerulean Zero was defeated, for now at

least. We all grabbed our crystals and hopped in the helicopter. We all thanked Olivia, and I asked, "Who's this?" I asked her. "Oh this is Jason, he's part of Tyler and Nelly's team, he was sick the day you saw him but he's okay now. We've been researching for information about the location of the electric crystal, and we found it in some random ancient ruins. So he has the power of electricity now. When he got it we figured out that you have to rub the crystal and it gives you powers. This helicopter is electric and we tested Jason's powers because the trip here took like 4 recharges. "Wait you guys took this whole trip here together in this tiny little helicopter!" I asked. "Yea, she answered, you guys are are top agents already, in the short

time you've been on the field, you've beat the thugs and found 7 of the legendary crystals that people have been looking for for centuries, you guys are legends." I thought about her words and felt many different things. I was flattered that she was calling us amazing, and half of me felt like I was jealous of Jason, but half of me felt I didn't really care.

We were on our way back to the ship now, and when we arrived back I pulled out my inti-tab and Olivia showed me a new app on it that I don't remember ever downloading that too, I pressed the app and there was one button that said, "Open garage door." I pressed it and a big door opened in the side. It was like 5

in the morning and we were all going to go to sleep.

Chapter 12: *Everyone is OP*

The next morning we all woke up with a smile on our faces. We all met up in the morning and we held the crystals in front of us. Olivia needed to tell us something first though, “You know how Emerald fainted, well the only reason that happened was because the Cerulean Zero had gotten into her mind with some sort of psychic powers, even though he hates magic, he might have to use it to stop it, so if and of you hear Cerulean Zero in your head, do not listen to anything he says, because even the top ECO agents couldn’t know what would

happen if he was able to make you do things that are way worse than just leading you to some abandoned ruins.” She nodded which meant she was done talking and we could activate the crystals. I was going to activate mine last because I wanted to see what happened to the others. Touni started, the same thing happened as Nelly, her eyes just glowed brown instead of red, and a brown aura appeared. Then Tyler did it, his was purple, then finally it was my turn. I took my crystal in my hand and I rubbed it, it flashed and then I didn’t see anything, I felt far away from my body. I felt far away that I had fallen on the floor. I heard a voice in my head, it said, “Levi, protect yourself, you must protect yourself, you are the chosen one, the

only one who can save the world by harnessing the power of creation, but you can not do it alone, you will need the help of Tyler to transport you and Nelly” The voice echoed on Nelly’s name and then there was a face I hadn’t heard in years, but still recognized it,

it was Lexus’s voice, “Levi, do not worry, we will se each other once again,

do not worry." I also saw Nelly in a beautiful dress and she was coming towards me." There was also a flash of some other people fighting with me. Then I heard her voice from the far away place, I heard it again, closer and closer, then the Cerulean Zero's voice was laughing, a picture of him holding pieces of my shattered crystal flashed through my mind right before I woke up to Nelly and Emerald, Touni, Tyler, Jason and Olivia, standing around looking worried. Nelly noticed I was awake and before any of them could say a word, I said, "I have so much to tell you guys!"

Chapter 13:

Under protection

Everyone was staring at me. Jason and Tyler were somehow drinking tea that looked like it came from England. I told them about my dream, seeing Lexus, the weird voice saying I'm the chosen one, me needing Tyler and Nelly to help me save the world, the other people fighting, but there was one detail that I left out, it was Nelly in the cute dress. I left that out for 3 reasons, one because I didn't want to tell in front of everyone that she was cute, two, because I really hoped that the detail wasn't important, and three, I didn't want to really want to

embarrass Nelly in front of her friends. I just decided to leave out the whole fact. I could tell Tyler and Olivia knew that I wasn't telling something. They didn't push. Olivia came up to me and told me in a grave voice. I'm going to take you back to ECO and we are going to keep you under protection by our best agents in protective white signature spy armor. She pulled out her Inti-Tab and showed me a picture of my new protection puppets.

I don't need bodyguards, I said disgusted. "Yes you do." said Olivia. Nelly mouthed the words, "I'm sorry". I felt like a baby all over again, needing my sister to babysit me. I didn't need that anymore, I was so frustrated.

Later Nelly came up to talk to me. I was sitting on the bed in my room watching a movie on my Inti-Tab. She knocked on the door and said, "Can I come in, it's Nelly. She said through the door. "Yea" I said. She slid open the doors and came in. She sat down next to me and said, "I'm so sorry Levi, but I know that you are not a complete weakling, I do think that Olivia is over exaggerating about protection. She put her hand on mine. And she gave me one of her winning smiles. Just then there was a boom. We

had landed back in Sagatic city. And Olivia knocked on the door. She opened it and I don't want to repeat this, so listen closely. It was the most awkward thing, she opened the door and saw, me and Nelly sitting on my bed and Nelly her hand on mine. She blushed, I felt my face burn, but somehow Nelly seemed totally fine. Olivia said, "Ok, I'll leave you guys alone, see you later." Nelly looked at me, confused. And I covered my face in my hands. Nelly didn't really seem to care about what Olivia saw her doing. But she realized that she embarrassed me. And she turned to me and said, still blushing, "I'm sorry" she said to me and she ran out of the room. I slowly sat up and walked outside. I saw one girl who I didn't recognize. Tyler

was talking to her. He came up to me and said hey Levi, I teleported here. A million questions went through my mind, who is this girl, how does Tyler know her. Teleport???. He can teleport! What?

Chapter 14: PPPs

“What in the world did I miss?” I exclaimed. Tyler looked confused, “What do you mean, what did I miss.” Tyler said. “I mean, who is this, you can teleport. What???” “Oh yeah, sorry I can teleport, you didn’t see it but I have been practicing on my psychic powers. I can teleport now.” He showed me a demonstration and teleported from the girl’s left, to her right and back. “Every time he teleported, he just simply vanished into purple dust. He introduced me to the girl. “Hi, I’m Lily, nice to meet you, Levi, is it? I’m Tyler’s friend.” We shook hands with each other. Olivia tapped on my shoulder and and said

"Time to get your PPPs as you like to call it." *Just an FYI, PPP stands for Personal Protection Puppets, I call them puppets because you're about to see.* The whole group walked in with me but then Olivia said to everyone else except me, "Guys this is private ECO duty." She was interrupted by some rude boy who said, "Hey Olivia, does your boyfriend have to do some private ECO doodie." "Mind your own business Nick!" She said while blushing. He snickered and walked off. She continued, clearly still embarrassed, "So can please only Levi come with me. They all walked off after that except Tyler and Lily, Tyler disappeared, and Lily came up to me and said. Good luck Levi, you seem like a good person. I hope you take care of Tyler. After that

she walked away and Olivia turned back to me and said, "Now that everyone is gone, I can finally show you your bodyguards, in person." She led me into one room, it had two doors. She pressed a button and the two doors disappeared and two other giant metal doors appeared in their place.

She went to one part of the door and took out some wand looking thing from

her pocket and said, "Cristalisus!" and a little pad appeared on the door, she wasn't too discreet and I saw the password she typed in, 90111. Then both doors disappeared and a giant room with couches and tv's and everything that a nice living room would have. The good vibing, happy room looked nothing like the two gloomy doors outside. Olivia cleared her throat and said, "Eco protection army-" I interrupted her by whispering into her ear, "puppets, not army." She looked at me and scowled. Right then, was the first time I realized they actually were like puppets, so what I called them, PPP's actually made sense. Back to the story, "How dare you make leader Olivia scowl, you shall pay." He got out his laser gun, and I started to

draw my sword, until Olivia said, "Stop soldier, this boy might be annoying sometimes." She smirked at me slightly while saying that and continued, "You will actually be protecting him." They nodded and I met the three main protectors who would be watching me at all times. Maya was a 13 year old girl who was fierce, almost the opposite of Nelly, there was one boy my age who looked serious, but seemed like he was actually super nice, and there was one more boy. He looked super duper serious, not an ounce of joking or fun. His name was Mark, he was 15 years old. Those three walked out with me and I went to my room, Mark and Maya stood there by my door and I whispered one more time under my breath before I

closed my door, "You guys are basically Olivia's puppets." Mark turned around and scowled at me and I gave myself a mental congratulations for making two people scowl at me today.

Chapter 15: The Real Problem

Before I went to sleep the night before, I took the last thing Lexus had gave me, a gold and diamond chain, I took it pulled it against my chest and said, "Don't worry Lexus, I will find you someday." Then I attached my crystal to the chain and put my new necklace over me. While looking through my stuff, I found the old coin device that had the L on it that I had found sitting on the tree in the crystal forest a while back.

It was a weird shape, somehow I recognized it, and some memory came back to me, but it wasn't complete, my parents, were looking at a book and they had a book and they were talking about something, something like some sort of amulet. There was something then I can't remember anything else after that. I don't want to keep trying to remember it because every time I try, my head starts hurting really bad. I gazed at the amulet a little more and than I decided to go to bed. I thought one more time about my personal protection puppets and how they were such an over-exaggeration.

I woke up the next morning, grabbed my new necklace and put on all my spy gear. I walked out the door glancing at

Mark and Maya who were apparently sleeping standing up. I walked away, and whispering over-exaggeration while I passed through the hallway. I was heading for the cafeteria, so I had to pass by the main lobby. I took the elevator down, and I walked out to chaos, people were running, yelling in all directions, people holding random inti-tabs running and yelling. I ran out and asked some random agent, "What in the world is going on here?" He answered with words that froze my brain, "Agent Olivia, you might know her, she works at the front desk, she's gone missing!"

The End!

Note from author:

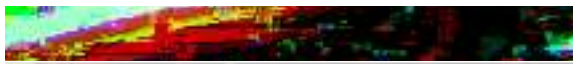

Thank you for reading book 2 :) if you can, leave a review, I don't care good or bad, I tried to leave it on a cliffhanger, but I don't know if I did a good job or not? There were a few questions for the Q&A section, you can check that later, I really hope you liked the book and even if you didn't, just know that I worked hard on it, you can buy the next book, or you don't have to, if you want to contact us, like to send us a question or fan art, you can send us an email at neonknightsgaming5@gmail.com. *Thanks for reading my book. If you liked it read other books by NEON KNIGHTS.*

Q&A

Unknown?

How old are Levi and Lexus in book 1?

In book 1, at the beginning, Levi is 10 years old, and Lexus is 13 and after the part that says 3 years later, you can do the math. ;)

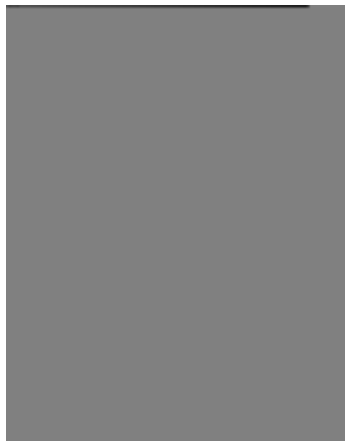

Why did you decide to start writing books?

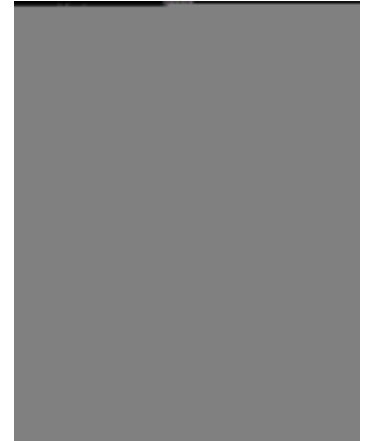

An interesting question, I had a bunch of ideas, and I wanted to write them down. I also wanted other people to see them.

The neon knights

We are actually a team of 3 people
we write books and play video
games and just play around. We
have these books so far:

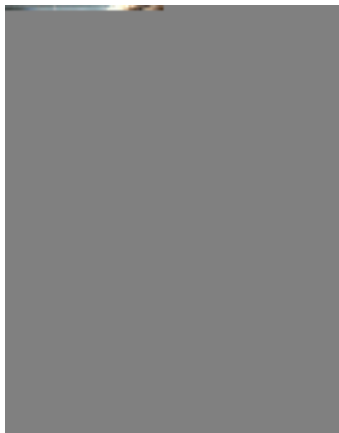

How it all started: Sagatics book 1

The first strike: Katana strike book 1

The rebellion: Katana strike book 2

If you have
anything to tell
us, contact us

at: neonknightsgaming5@gmail.com,

COMING SOON: NeonKnights.com

If you need help with video games,
mainly Minecraft,, contact us and we
will make a server to help you.

ALSO COMING SOON: YouTube
channel
